

Open Source Brain Workshop – Sardinia – 12-14 May 2015

Open Source Brain (<http://www.opensourcebrain.org>) is an initiative which brings together modellers and experimentalists interested in creating open source, collaboratively developed models of neuronal systems.

The third Open Source Brain meeting will provide an up to date overview of the OSB initiative and associated technologies, including presentations from experimentalists, modellers and application developers. Presentations will cover various brain regions including cortex and cerebellum and there will be a day focused on creating and sharing experimentally constrained models of the hippocampus.

Dates: Tuesday 12th May - Thursday 14th May, 2015 **Location:** Hotel Calabona, Alghero, Sardinia
Organisers: Angus Silver, Padraig Gleeson, Sharon Crook, Boris Marin, Sergio Solinas, Paolo Enrico

Confirmed speakers:

Giorgio Ascoli	Krasnow Institute, George Mason University, USA
Tiago Branco	MRC Laboratory of Molecular Biology, Cambridge, UK
Claudia Clopath	Imperial College London, UK
Michael Hines	Yale University, USA
Peter Jonas	Institute of Science and Technology, Austria
Artur Luczak	University of Lethbridge, Canada
Troy Margrie	MRC National Institute for Medical Research, London, UK
Michele Migliore	National Research Council, Italy & Yale University School of Medicine, USA
Yiota Poirazi	Foundation for Research & Technology Hellas, Greece
Martin Pyka	University of Bochum, Germany
Stefan Remy	German Center for Neurodegenerative Diseases, Bonn, Germany
Nelson Spruston	Howard Hughes Medical Institute, Janelia Farm Research Campus, Virginia, USA
